COMPANY PROFILE

As world population grows, and natural resources are depleted faster than they are renewed, the need for infrastructure and energy becomes a necessity comparable to drinking water and food. Quality of design, construction and installation plays a vital role for governments and investors who want to achieve cost savings and high quality of public service standards. As Contractor's timeline for projects decreases and global competition increases harshly, effectiveness and efficiency becomes vital more than ever.

By anticipating this necessity and by smelting its long experience and capabilities in one pot, Intertek Design and Build has become a successful international contractor and a trusted MEP solution partner for domestic and international projects.

Our growing reputation comes from our dedication to the project objectives and from the quality of the work we perform. Our long history of projects, and most importantly the many repeat projects which have been awarded to us by our past clients and partners, proves the strength and success of our approach. We ensure this success by pledging to always reach project standards, to always deliver our works timely, and to always be part of the team.

As an experienced international contractor, we know how to mobilize, to staff, to equip, and to overcome the many challenges of multi-national works.

We know how to build a project and to overcome the challenges of multi-national works as we have learned how to work with diverse cultures, languages, and to overcome the challenges of multi-national works.

Become a client, become a partner, and become a part of the family.

AREAS OF EXPERTISE

Transportation - Motorways Lighting and Infrastructure

Industrial Facilities - Manufacturing Plants and Oil & Gas Refining

Energy - Power Substations, Extra High Voltage and Power Distribution Systems

Pipelines - Pumping Stations, Tank Farms and Cathodic Protection Systems

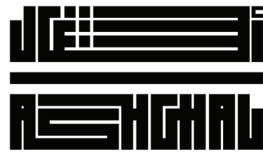

Airport - Airports, Airfields, Apron, Hangars and Runway Lighting

MEP Residential & Commercial - High-Rise Buildings, Residences, Compounds, Stadiums and Shopping Malls

Government - Buildings, Military Installations, Compounds and Facilities

ELECTRICAL & INSTRUMENTATION WORKS

Besides our solutions for Electrical and Automation installations in Motorway, Infrastructure, Residential and Industrial Projects, as **INTERTEK DESIGN & BUILD**, we are qualified and experienced in Oil & Gas Projects Electrical & Instrumentation installations.

We have been a solution partner for our clients from construction to commissioning stage for Electrical works;

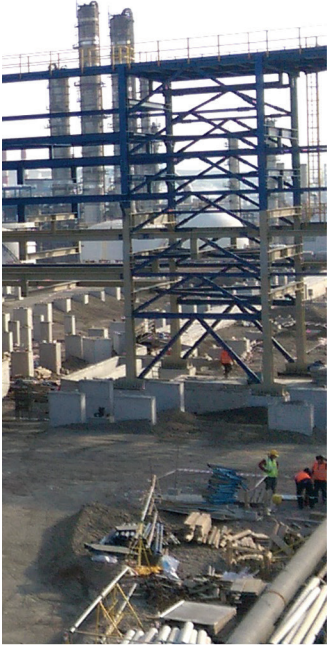

- HV, MV and LV switchgears and transformers
- SAT Test of Switchgear and Transformers such as Protection Relay Test, MCCB Test, VT & CT Test, Oil Treatment and Oil Dielectrical Test, HI-POT & IR Test, etc..
- HV, MV and LV Power Distribution and terminations
- MEP Works of Substation and Administration Buildings such as lighting system, F&G System and Telecommunication System
- Lighting System, F&G System, and Telecommunications System Installations of Refinery Units
- Cathodic Protection for Tanks and Pipe Lines-
- Motor Solo Run and Load Run Test

For Instrumentation Works;

- Calibration and Installation of Instrumentations
- Multicore and Single core cabling and terminations
- Tubing Works
- Loop Test
- Assistance of Functional Test

MECHANICAL WORKS

As **INTERTEK DESIGN & BUILD**, we are ready to be a solution partner for our clients for all,

STRUCTURAL WORKS

Steel Structure Design and Erection Works

Equipment platforms, steel platforms design and erection works

Jetty and Piperack design and erection works

PIPING

Pipeline Construction

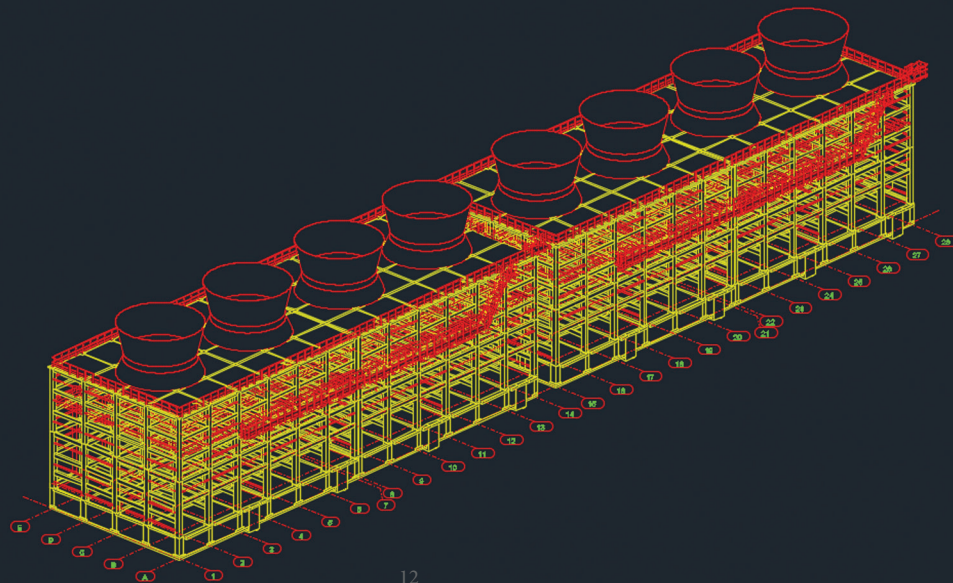

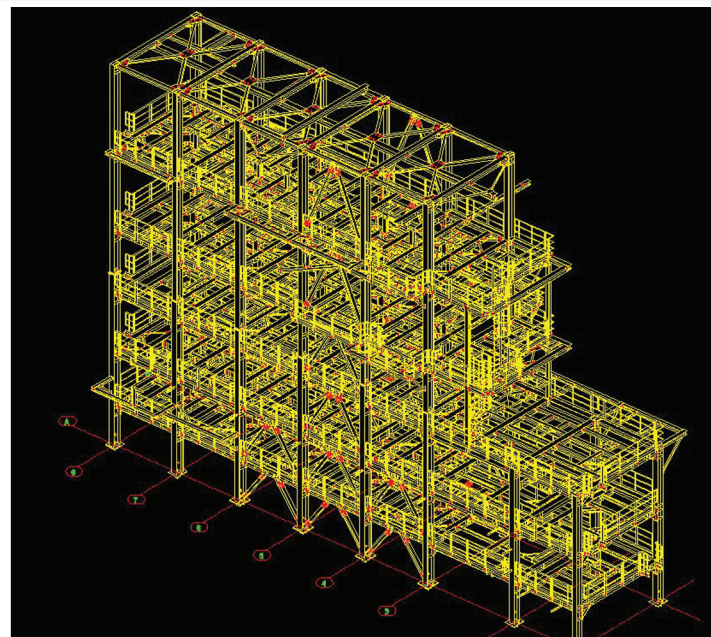

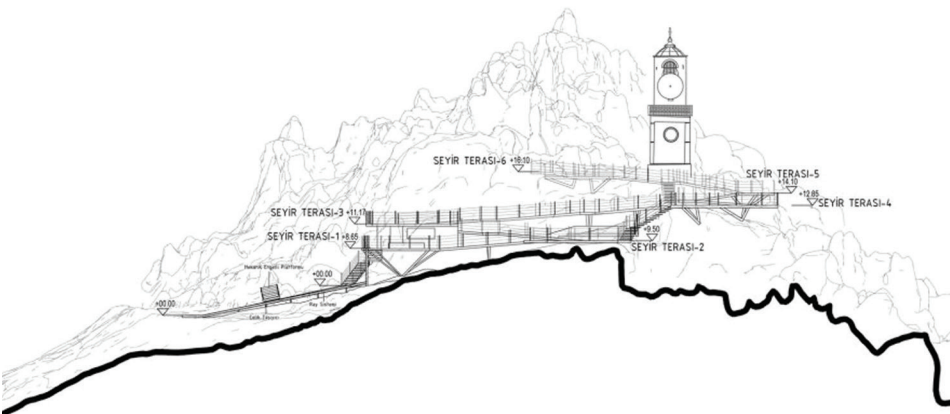

Process Lines construction and installation

Pre-commissioning and Commissioning works

MECHANICAL

Stationary/Rotary Equipment Installation

Pre-commissioning and Commissioning works

INDUSTRIAL DESIGN SERVICES

Together with our experienced and qualified associates **INTERTEK DESIGN & BUILD** provides civil, architectural and MEP engineering services for design works and consulting for construction/project management of industrial facilities, factories, administration buildings, infrastructure, marine projects and other structures.

We collaborate with architects, building owners, builders, government and /or private employers to provide the best solutions for;

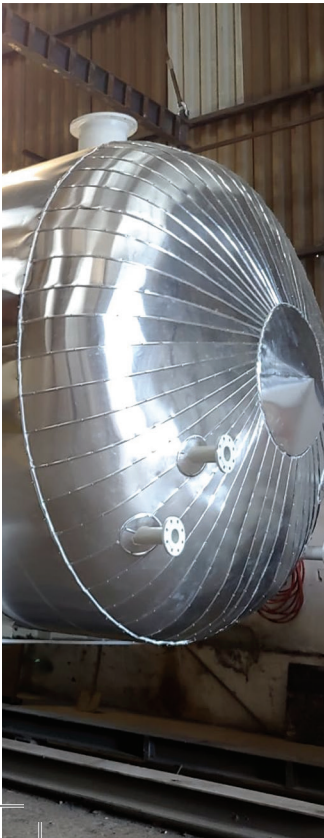

- Project planning, work schedules and progress monitoring services,
- Design management and coordination,
- Cost control and progress payment analyses regarding unit prices and/or lumpsum contracts,
- Contractual disputes and disagreements studies,
- Price evaluations for subcontract tenders and subcontract preparations, services for procurement preparations,
- Specifications, reporting and technical supporting on construction sites.

Also, **INTERTEK DESIGN & BUILD** provides engineering services for seismic performance analysis, reporting, retrofitting design management and consulting for construction of structures. These services contain site investigations, geotechnical analysis and reporting, building survey for structural analysis, strength evaluation of existing structure materials by drilling and testing of core samples.

The above mentioned services can be supplied by **INTERTEK DESIGN & BUILD** within the required schedule with optimum prices and in terms of maximum quality requested by employers.

OIL & GAS OPERATIONS

INTERTEK DESIGN & BUILD provides a comprehensive range of construction and fabrication services to Oil, Gas, Petrochemical and Chemical industries.

INTERTEK DESIGN & BUILD is your trusted partner for fabrication of the highest quality and safety specifications. Our company is capable of presenting a complete project that would include design, engineering, fabrication, installation and commissioning.

- 3-phase Oil&Gas Separators
- Drilling Mud Plants,
- Solid Control Tanks, Frac Tanks
- Offshore and Land Drilling Structural Fabrications
- Oil&Gas Processing Plants
- Gathering and Transmission Pipelines
- Pig Launchers and Receivers
- Heat Exchangers and Process Piping

Prefabricated Modular System Buildings:

- Drilling Rig Camp Office Containers
- Main Camp Crew Accomodation Containers
- Rig Mats
- Skid Mounted / Trailer Mounted Operation Units
- Custom Build Modular Containers

TURNKEY ACCOMODATION FACILITY SERVICES

INTERTEK DESIGN & BUILD is a high standard and low cost solution partner for needs of Governments, Contractors and Private Clients for complete pre-fabricated accommodation and office facilities.

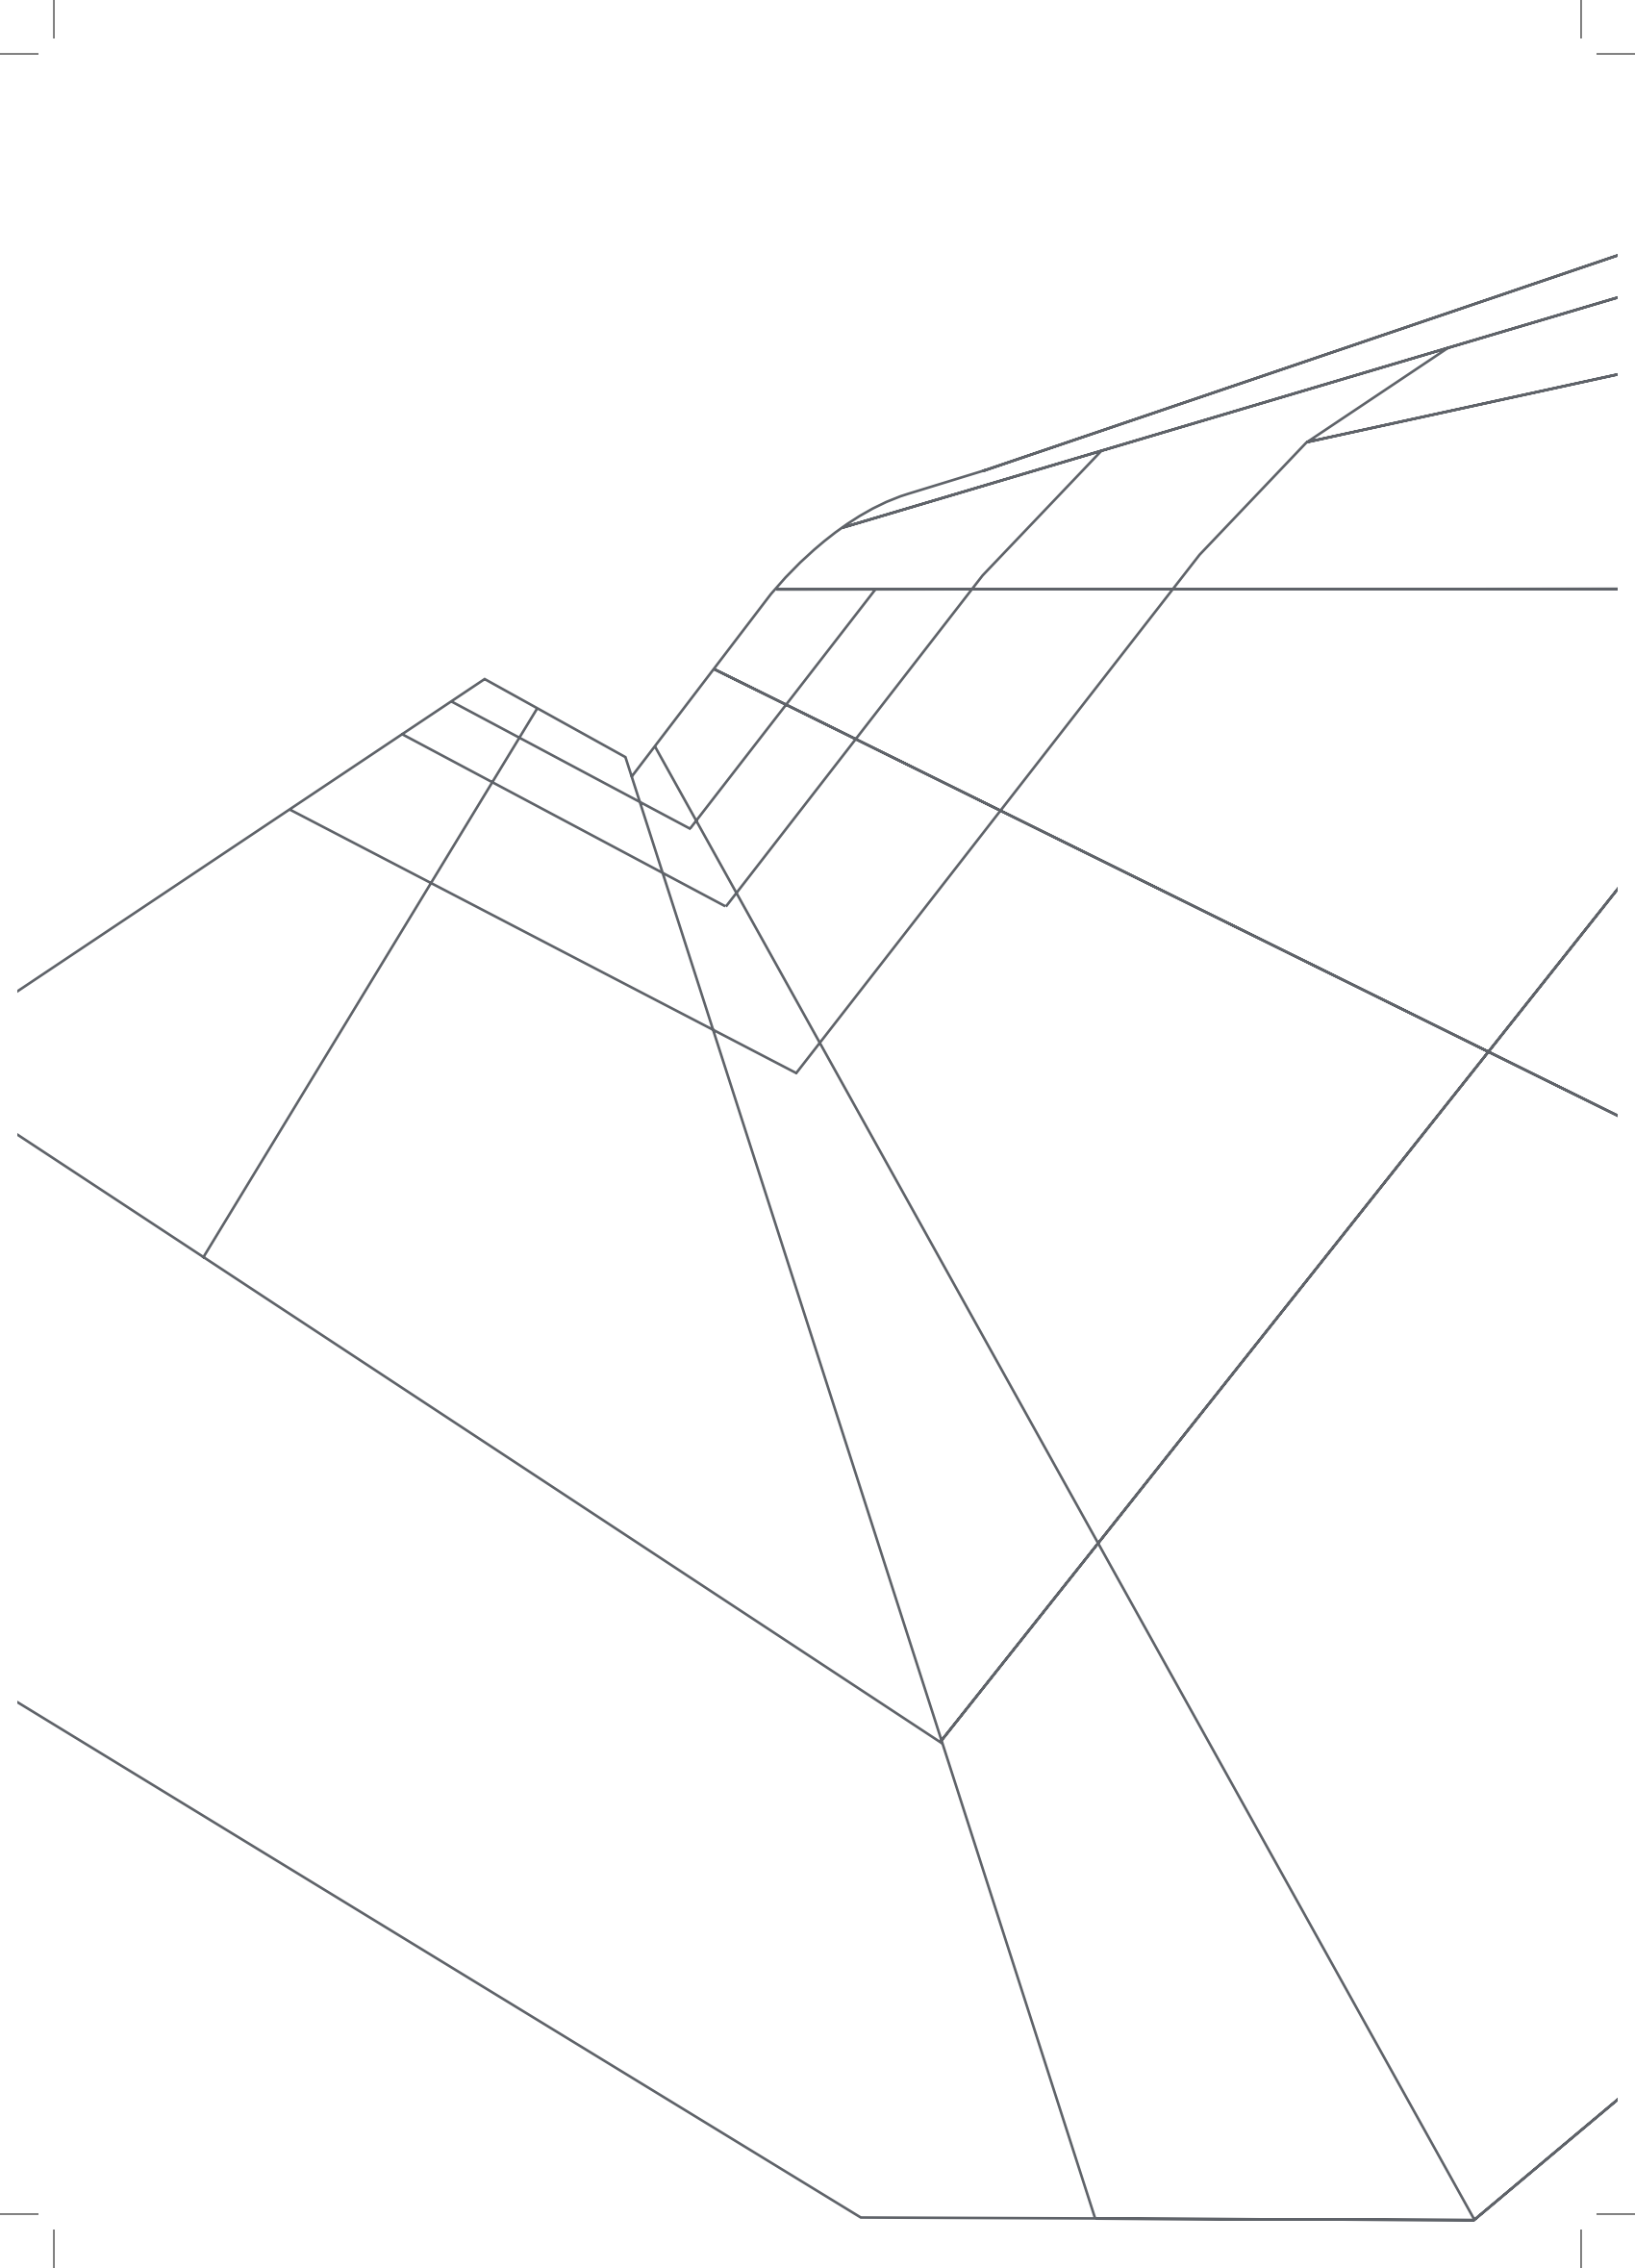

Up to date **INTERTEK DESIGN & BUILD** successfully built accommodation facilities internationally with different geographical and client requirements from the frozen marshes of Kazakhstan to deserts of United Arab Emirates.

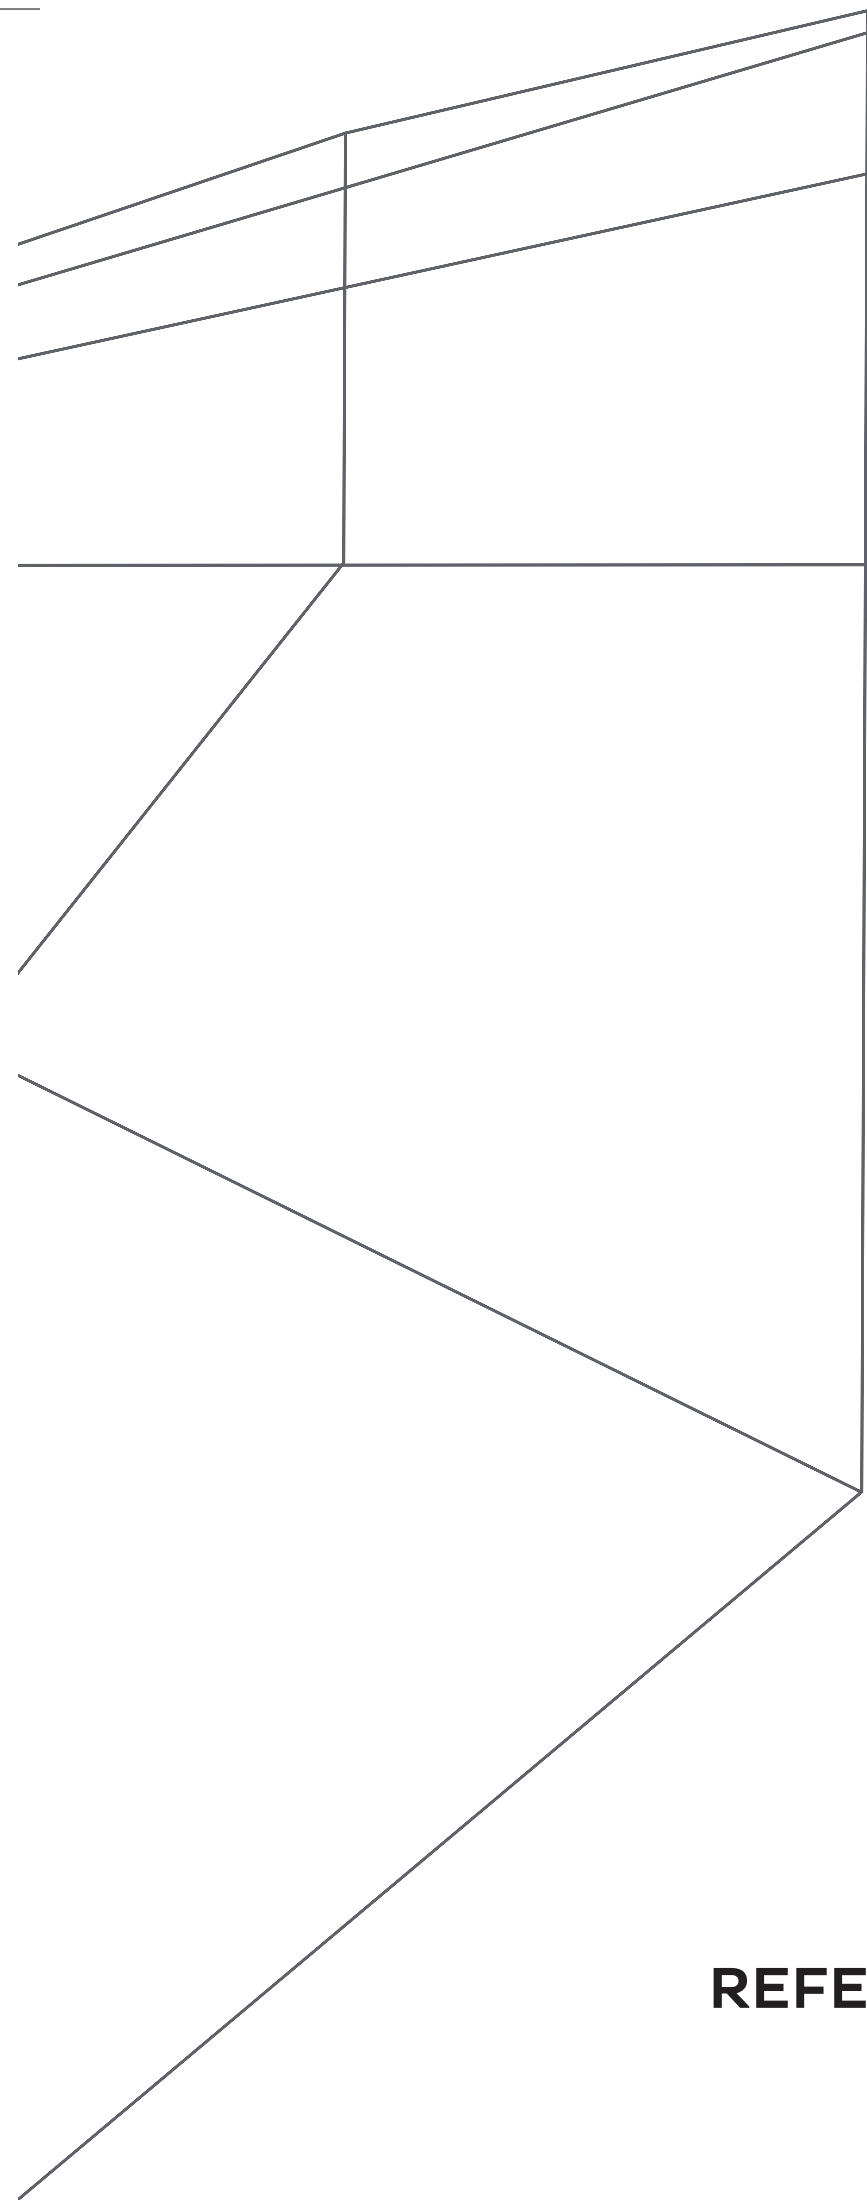

Our Turnkey solutions includes;

- Worker Residential Cities
- Worker / Labour Camps
- Military Camps
- Refugee Camps
- Emergency Accommodation Camps,
- Life Support Camps
- Logistic Base Camps
- Industry Buildings
- Aircraft Hangars
- Workshops
- Warehouses
- Cold Rooms
- Garages

Our Turnkey Services includes:

- Architectural and Engineering Design
- Procurement
- Planning and Site Survey
- Mobilization
- Complete Civil Works
- Site Preparation & Earth Works
- Foundation & Concrete Works
- Infrastructure Works and Utilities
- Site Electrical & Mechanical Installation Works
- Fire Detection, Alarm, Fighting & Controlling Systems
- Power Plant and Generators
- Potable & Sewage Water Treatment System
- HVAC Systems
- Furnishing
- Operation and Maintenance
- Demobilization

AL KHOR EXPRESSWAY PROJECT

INTERTEK DESIGN & BUILD was proud of being the solution partner for Qatar's one of the most prestigious and grand projects, Al Khor Expressway.

The project follows the alignment of the Al Khor Coastal Road between Lusail and the proposed Al Khor Bypass as this new expressway have five traffic lanes in each direction. The carriageways are divided by a central median which includes provision for the Qatar Rail Metro Red Line.

By executing infrastructural and electrification works, Intertek Design Build proved itself once again by completing this critical project earlier than the contractual completion date by solving complex site and design challenges.

INTERTEK DESIGN & BUILD work scope included the complete procurement, construction and installation of below items;

Street (Road) Lighting:

Trench Excavation: 81km
Cable Laying: 115 km
STL Foundation Installation & Pole Erection: 1650
HM Pole Erection: 321
Earthing Pit: 545

Structural Lighting Works:

Cable tray Installation: 2.8 km
Cable Laying: 42 km
Lighting fixture & JB Installation: 2800 Nos
Distribution Board Installation: 55 Nos

Dry Utility (Telecom Works):

Excavation: 140 km
Pipe Laying: 147 km
Manhole Installation: 866 Nos

Electrical Distribution System (Medium Voltage & Low Voltage):

Trench Excavation: 97 km
Cable Laying: 109 km

Electrical Distribution System (Extra High Voltage):

Trench Excavation: 20 km
Cable Laying: 20 km

Substations:

4 Indoor
3 Outdoor

North Road Doha, Qatar

Contract 2 & Contract 3 Ceremonial Road Additional Completion Work for North Road Project Design & Contract Service Road Enhancement to North Road Corridor (P059)

North Road (Al Shamal Road) is one of major motorways in Qatar. Total length of North Road is 98 km dual carriageway and it's connecting Al Shamal to capital city Doha. North Road has implemented 93 km into a four-lane highway (a total of eight lanes) with multi-level interchanges.

Ceremonial road or National day ceremonial road is the new road that connects the Dukhan highway with Al Shamal road (North Road). Consist of 10 km Dual 3 lanes Highway, 25 km two lanes with 6 ea. Roundabouts.

Additional Completion work for North Road Project, Re-construction 27 km of roads connected to North Road at Duhail, Kheesa, Khuraitiyat, Umm Salal Ali, Umm Salal Mohammad, Umm Obairiyah and Umm Garn.

North Road Corridor (P059) Implementations and enhancement at North Road service roads, new dual carriageways to Umm Birkah and Al Khor. Construction at N5, N8, N10, N12 and N66 new bridges and fly overs on North Road,

Continuous motorway lighting provided with high mast lighting systems on motorway and traditional lighting on sideways and connection roads Intertek has completed electrical installation works of motorway lighting.

Intertek has completed all motorway lighting systems, overhead signs lighting, underbridge lighting, tunnel lighting and traffic signals.

Intertek has worked on all infrastructural networks such as ITS system, QTEL system, Emiri (QAF) Qatar Armed Forces system, (DSS) Doha Street Surveillance systems.

Intertek has worked on motorway energy supply, including 11kV substations and 0.4 kV switchboard installation works, all engineering drawings and the procurements have done by Intertek for overall project leading by Ashghal and Kahramaa.

Intertek has also completed Extra High Voltage (EHV) cables diversion works.

Tengizchevroil SGP Second Generation Project Refinery Atyrau, Kazakhstan

Tengizchevroil LLP is the largest Kazakhstani company that explores and develops the super giant Tengiz oilfield in the Atyrau region.

In this region, Tengizchevroil operates the Second Generation Plant (SGP) which is the largest single sour crude processing train in the world. In 2006, after the completion and commissioning of a large expansion, its capacity was greatly increased, and through the installation of advanced technology systems, environmental protection and energy efficiency were greatly improved.

For this refinery expansion project, Intertek performed electrical and instrumentation works including; installation of LV and MV systems, installation of 2000 kVA Power Transformers, lighting fixture installations, power distribution and terminations, and installation, calibration and testing of instrumentation pipes and equipment.

Sugözü Thermal Power Plant Adana, Turkey

Sugözü Thermal Power Plant is the first coal fired power plant which was built and operated by the private sector in Turkey. The Sugözü Power Plant was constructed by Siemens AG, Babcock Borsig Power AG, Gama-Tekfen JV and Siemens A.Ş. Consortium. The Sugözü Plant provides power to the 380 kV national grid (9 billion kWh electrical energy per year) via a HV switchyard consisting of 8 bays of dual 675 MVA transformers. At the time, these were the largest installed transformers in Turkey.

For this project, Intertek performed instrumentation & control and electrical installation works for many of the main components of the facility, including works for; the boiler house, the turbine generator, the main control building, water purification plant, main transformers and for facility lighting.

Msheireb Properties Doha, Qatar

The \$5.5 billion Msheireb development, one of the largest Neighborhood Development projects in the Middle East, is redeveloping and transforming a 31-hectare site at the center of Doha by creating a mixed-use community consisting of over 100 buildings. This new community will provide housing, workspaces, and social amenities, while retaining links to the culture of the past.

Creating an environmentally sound and sustainable community is a primary goal of the project. Therefore, the entire project is designed and constructed to achieve LEED Gold® certification, with several buildings targeting LEED Platinum®, plus a LEED for Neighborhood Development® certification. At the project's completion Msheireb will be "one" the largest LEED development in the world.

Intertek's solutions partner in the Middle East, Interface Global Qatar is the prime project consultant responsible for ensuring that the requirements for LEED design, construction and certification are achieved. As the LEED project consultant, Intertek together with Interface Global Qatar, has assembled and directs a team of international specialist sub-consultants, to manage, certify and commission this development according to LEED® standards.
